

Nexus Home Multimedia Hubs

Nexus Home Multimedia system allows you to design your multiroom audio and video system to suit your home. With a simple CAT5 based installation the system will cater for all your audio, video, control, data and telephony needs.

Nexus Home Multimedia Hub

Nexus hub routes music and video all around your house from all your AV equipment. It is modular allowing you to build a system to suit your home and it is designed to be futureproof and upgradeable as you grow. It is also simple to use giving you control of all your equipment at your fingertips.

6, 9, 12 or 18 rooms.

6, 9 or 12 AV sources (eg Satellite, Freeview, DVD or music players)

Composite Video

Stereo Line Level Audio

Nexus Amplifiers and Ceiling speakers

Complement your home with in ceiling speakers. Nexus ceiling speakers have built IR receivers for a simple elegant installation. Each speaker is powered by an amplifier. The Nexus Amps are placed at the central hub for maximum flexibility and accessibility.

Wiring with CAT5 and 4 core speaker wire to speakers.

15W per channel stereo amplifier.

Nexus Modular Amp case holds 2-6 amplifiers

AVNex can provide a range of quality and styles of speakers, powered by any choice of amplifier. You can also place individual amplifiers in the ceiling wired with CAT5 to the hub and a local 12V ac power supply.

Nexus Patch Panel box

The Nexus system uses industry standard CAT5, 5e, 6 or 7 cabling in a star configuration to a central hub. Nexus patch panel box terminates CAT5 and speaker wires.

8-48 CAT5 terminations

6-12 ceiling speaker connections

Cable Cat5, 5e, or 6, 7 Unshielded or Shielded.
